OTHER PROJECTS

Husky-Info. *Northeastern University*
Web Application - React, Java, MySQL

Spring 2020

- Designed and developed a new platform that allowed students to search for information and share feedback about courses taught at NEU, as well as search for events related to a particular educational topic.
- Provided professors with a more dynamic way of communicating with students interested in taking their classes by allowing them to post content related to their courses and answer questions or comments from students.
